Lynne Edwards is the Director of Advertising and Sponsorships for the Florida Home Builders Association and the Southeast Building Conference.

White & Translucent Hurricane Panel "ValueGuard"

Finally, a hurricane panel that is ultra lightweight, safe and easy to handle. No more "living in a cave" this panel is luminescent allowing inward light. A beautiful solution for those that need to leave panels up or when

living in a community with a Homeowner Association. An economical solution that meets most major Building Codes. Tested to the latest ASTM standards. Cost efficiency and translucency make this a smart decision. "Why settle for metal"?
